

Uplift your SI skills

Ms. Sheila M. Frick, an internationally esteemed clinician and pioneer Occupational Therapist, is to share her profound and effective Sensorimotor Integration program to uplift your SI skills.

From Sensation to Function: A Sensorimotor Affective Treatment Perspective

February 17-18, 2019 (Sun-Mon), Hong Kong

Course Summary

This practical two-day, activity-oriented workshop provides a neuroscience-based theoretical overview of sensorimotor integration.

Participants will explore each of the sensory systems and their impact on arousal, affect regulation, and organization of functional movement patterns that support attention and executive functioning. Through lecture and interactive lab experiences, participants will discuss its' impact on postural organization and the underpinnings of visual and auditory attention.

An experiential learning lab will introduce a **specific clinical observation tool** that will more precisely guide assessment and treatment planning. Participants will leave with an understanding of treatment principles and practical activity suggestions that can be tailored to each individual, a variety of diagnosis (including Autism, ADHD, Sensory Processing Disorder, and Developmental Delay), and are appropriate for a variety of environments.

Course Objectives

Upon completion of the course, participants will be able to

- Administer the Clinical Observations and Quality of Movement Assessment
- Implement ten strategies that address vestibular-postural-ocular organization
- Select three sound tools that support regulation, movement organization, and attention
- Identify the five characteristics of a well-regulated state

Venue

Venue in Tsim Sha Tsui (Venue detail to be provided)

Certificate

Certificate will be issued to participant with full attendance.

The Speaker

Sheila Frick, OTR/L is an internationally esteemed clinician, lecturer, and pioneer in Occupational Therapy. She has well over 30 years of clinical experience, having worked in psychiatry, rehabilitation, and home health before specializing in pediatrics. Her expertise includes sensory processing dysfunction, sensory integration, and auditory interventions.

Sheila created and continues to expand Therapeutic Listening®, which has been taught to over 14,000 therapists worldwide. She also lectures on topics such as clinical neurology, respiration, the vestibular/auditory system, and various auditory interventions.

Sheila is the author of *Listening with the Whole Body: Clinical Concepts and Treatment Guidelines for Therapeutic Listening*, and co-author of *Core Concepts in Action*; *Astronaut Training: A Sound Activated Vestibular-Visual Protocol*; and *Out of the Mouths of Babies*. Recently, Sheila served as a contributing author for her section on Therapeutic Listening in the upcoming 3rd edition of *Sensory Integration: Theory and Practice*.
